## Sponsorship Form

Action Bladder Cancer UK works to improve the lives of people with bladder cancer. Your support will help us run our programmes of patient information and support, improving outcomes for bladder cancer patients, supporting research and raising awareness. Bladder cancer is not a rare cancer – it's one of the top 10 most common cancers in the UK, with over 100,000 people currently living with it across the country. Despite this, treatments for bladder cancer have changed little over the past 30 years and bladder cancer receives less than 1% of research funding. For further information, please visit **www.actionbladdercanceruk.org**.
