

Bladder Cancer

- have you heard about it?

The artist Tracey Emin was diagnosed with bladder cancer in the Spring of 2020, when she was 58.

Resulting surgery that summer removed her bladder and several adjacent organs. She is now in remission, living with a stoma bag. Her recent art has reflected her experience of living with cancer.

“
We can't always see people's disabilities and living with a stoma is difficult.”

Bladder Cancer Symptoms

- Blood in your wee, even just once
- Persistent urinary infections
- Pain or discomfort on passing urine
- Need to pass urine more often or urgently

It may not be bladder cancer... but don't take a risk...take action...contact your GP.
